DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-3 and 6-8 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by the United Kingdom patent ('672).

Election/Restrictions

3. Claim 5 is withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on October 12, 2004.

Response to Arguments

4. Applicant's arguments filed June 24, 2005 have been fully considered but they are not persuasive. Applicant maintains that the United Kingdom patent ('672) does not disclose an additional duct conducting the air-conditioned air from the defroster duct to an upper ventilation outlet which is provided on the upper surface of an instrument panel to blow the air-conditioned air toward the upper rear of a passenger compartment. To the contrary, see page 3, first and second full paragraphs and page 4 wherein the duct leading to the outlet 15 (Figure 6) corresponds to the claimed additional duct.
5. In response to applicant's argument that the references fail to show certain features of applicant's invention, it is noted that the features upon which applicant relies

Art Unit: 3749

(i.e., there is only a single air supply duct 18, see page 7, first full paragraph of applicant's remarks) are not recited in the rejected claim(s). Although the claims are interpreted in light of the specification, limitations from the specification are not read into the claims. See *In re Van Geuns*, 988 F.2d 1181, 26 USPQ2d 1057 (Fed. Cir. 1993).

Moreover, the United Kingdom patent discloses not only the two ducts leading to the outlets 15 but ducts leading to central nozzle 16 and side nozzles 17.

6. As to an additional duct branching off from the defroster duct, the duct leading to the outlet 15 (Figure 6) branches off from the defroster duct, perhaps more appropriately understandable, when the pivoting flap is in its right pivot end position.

Conclusion

7. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

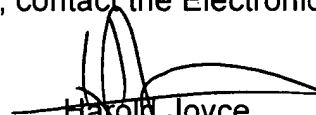

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
